### HEALTH NUGGET

Our bodies are 50-60% water and we lose approximately 80 oz of water daily through normal body functions, and this needs replacing each day. This is done by eating a diet of natural foods that contain water and by drinking enough pure water. A dry mouth, chapped lips and being thirsty can be signs of dehydration. Water should not be taken with meals and drank no closer than 1/2 hour before or 1 hr. after meals.
